

**OBJECT-ORIENTED METHOD AND SYSTEM  
FOR TRANSFERRING A FILE SYSTEM**

**ABSTRACT OF THE DISCLOSURE**

5 An object-oriented method and system for transferring a file system including folders and data files  
from a source data storage controlled by a source data processing unit to a destination data storage  
controlled by a destination data processing unit over a transfer medium. This method consists in  
building in the source data storage at least one file object containing the data package to be  
transferred, generating a descriptor file including the parameters associated with the file object,  
generating an archive file including the data package, and transmitting the descriptor file and the  
archive file from the source data processing unit to the destination data processing unit over the  
transfer medium.
